Retired military veteran looking forward to starting another rewarding career.

An extremely enthusiastic and self-motivated person seeking a new career in software. A love for challenges that require problem-solving and outside-the-box thinking. Proven to accomplish tasks as an individual or part of a team.

SKILLS

Database Administrator
- Served as an administrator of a database for the National Guard. The database included 7 aircraft, countless part numbers & serial numbers, maintenance accomplished, and several hundred personnel.

Google Analytics Certificate
- Completed the Coursera Google Data Analytics course. The course gives an understanding of the processes used by a junior or associate data analyst. Acquired skills such as data cleaning, data analysis, and data visualization. Learned how to use spreadsheets, SQL, R programming, and Tableau.

System Administrator
- Maintained 27 laptops for the National Guard on a network used to document maintenance actions accomplished, personnel accomplishing maintenance, parts replaced, and serial numbers replaced. This also included cloning hard drives, running security updates, installing software, and diagnosing and fixing issues, on laptops with government security protocols.

Leadership
- Led small and large numbers of military personnel in various situations such as maintaining aircraft, managing flight time of personnel and aircraft, and the monthly training required for mechanics.

Programming Language
- Experience programming in C++, Visual Basic, and Visual Basic .NET (VB.NET).

Web Development
- Experience in web development using Hypertext Markup Language and Cascading Style Sheets.

Other Skills
- Microsoft Excel
- Microsoft Powerpoint
- Research
