PERSONAL OBJECTIVE

As a dedicated U.S. military veteran with extensive experience spanning every facet of aviation maintenance, I have consistently demonstrated a commitment to excellence, problem-solving, and adaptability. Now, as I transition to pursue a degree in Computer Science and Engineering, my objective is to leverage my diverse background and technical skills to excel as a web developer. With my upcoming Associates degree in sight, I am eager to apply my disciplined work ethic, attention to detail, and passion for technology to contribute meaningfully to dynamic projects and collaborate within innovative teams. My goal is to continuously learn, grow, and make impactful contributions in the realm of web development, translating my military precision into code that drives positive user experiences and advances technological frontiers.

PROFESSIONAL SKILLS & EXPERTISE

Database Administrator

- Served as an administrator of a database for the National Guard. The database included 7 aircraft, countless part numbers & serial numbers, maintenance accomplished, and several hundred personnel.

System Administrator

- Maintained 27 laptops for the National Guard on a network used to document maintenance actions accomplished, personnel accomplishing maintenance, parts replaced, and serial numbers replaced. This also included cloning hard drives, running security updates, installing software, and diagnosing and fixing issues, on laptops with government security protocols.

Leadership

- Led small and large numbers of military personnel in various situations such as maintaining aircraft, managing flight time of personnel and aircraft, and the monthly training required for mechanics.

Programming Language

- Experience programming in C++, Visual Basic, Visual Basic .NET (VB.NET), Python and Java.

Web Development

- Experience in web development using Hypertext Markup Language, PHP, and Cascading Style Sheets.

Other Skills:

Github	Elementor	Wordpress	DB2
PhpStorm	Microsoft Excel	Microsoft Powerpoint	Research
